Master of Science in International Health

The post-graduate Master's program in International Health (M.Sc. IH) focuses on health-related challenges in low and middle-income settings. The interdisciplinary approach aims to provide students with knowledge in international and global health, covering global public health, infectious and non-communicable diseases, chronic diseases, health economics and politics. Furthermore, students will be trained in research methods and skills in order to conduct research for their MSc thesis.
